- Health is one of Peru's fastest growing sectors and is expected to continue being so for years to come :
 - > Low health expenditure (4.6% of GDP vs. 8.2% in Chile).
 - > Only 1.2 mm insured in EPS system vs. 5.9 mm in ESSALUD and 3.8 mm uninsured but with purchasing power.
- > Insufficient supply of hospital beds for a growing demand:
 - > Strong demand for health services has shifted power to health service providers and puts significant pressure on costs.
 - > Joint legal liability of EPS for services provided by third-parties increases the risk.
 - > Main competitors operate under vertically integrated models (Rímac, Banmedica, Colsanitas, Oncosalud, Mapfre).
- > Health business is essential for PPS' strategy:
 - > Clients prefer to work with insurers who can meet all of their insurance needs.
 - > Despite representing a little over 40% of Pacifico's net earned premiums, the health business accounts for only 10% of our net income.
 - > High potential to increase profitability through vertical integration.

- Pacifico's strategy is based on a proven model of integrated health risk management networks (similar to Kaiser Permanente), using key articulators.
 - Low, medium and high complexity services
 - Electronic Health Records
 - Telemedicine.
- This strategy has been 2 years in the making working closely with top local and international consultants:
 - MGMA Operations; Deloitte IT; HKS Architectural design.
- Network will require an investment of up to US\$ 150 mm within the next two years, the foundations of which are being built through the following acquisitions:
 - Doctor +
 - Clínica El Golf
 - Clínica San Borja
 - Clínica Galeno.
- We expect 20% ROE and 3x current contribution of health business by 2015
